Summary

Dynamic Full Stack Web Developer with expertise in building scalable web applications using React.js, Next.js, NestJS, Express.js, and Laravel. Proven track record in developing responsive user interfaces, optimizing backend APIs for performance, and integrating seamless full-stack solutions. Skilled in troubleshooting, feature implementation, and deployment processes to deliver high-quality, user-centric applications that enhance efficiency and user experience.

Education

Hamzanwadi University, BC in Computer Science – East Lombok, Indonesia   Sept 2019 – Sept 2023
- GPA: 3.75/4.00

Experience

Fullstack Developer, Davis Materialworks – East Lombok, West Nusa Tenggara (Remote)   June 2025 – June 2025
- Diagnosed and resolved critical bugs through rigorous troubleshooting, enhancing application stability and reducing downtime for mission-critical web systems.
- Engineered enhancements and new features, contributing to improved system functionality and user satisfaction in a fast-paced development environment.
- Orchestrated deployment processes, ensuring smooth releases of updates and optimizations that maintained operational efficiency and scalability.

Web Developer Assistant, Freelance – East Lombok, West Nusa Tenggara   Aug 2024 – Mar 2025
- Collaborated with senior developers to debug and test web applications built with Laravel, Next.js, and NestJS, resulting in faster resolution of issues and enhanced code quality.
- Implemented targeted features and bug fixes under expert guidance, accelerating project timelines and supporting robust application maintenance.
- Mastered development workflows, including Git version control and API integrations, to streamline collaboration and deliver reliable full-stack solutions.

Fullstack Web Developer, Regional Research and Innovation Agency of West Nusa Tenggara – West Lombok, West Nusa Tenggara   July 2022 – Nov 2022
- Designed and developed a full-stack web application using Flask, incorporating responsive design principles to ensure cross-device compatibility and optimal user experience.
- Integrated frontend and backend components, enabling seamless data flow and functionality that supported research and innovation initiatives.

Web Developer, Village Development Program (PKKM) Sembalun District – East Lombok, West Nusa Tenggara   July 2021 – Nov 2021
- Developed and managed village websites using WordPress, boosting digital presence and community engagement through intuitive interfaces and content management.
- Configured and maintained OpenSID-based Village Information Systems, facilitating transparent administrative services and accessible data for local stakeholders.
- Collaborated with stakeholders to gather requirements and implement customized features, aligning solutions with village-specific needs and improving operational transparency.
